1.0 INTRODUCTION AND EXECUTIVE SUMMARY

Mudango Computers LTD. is an IT Consulting Company providing integrated and managed multi-carrier, virtual network security and technology services we also specialize in corporate and small-to-mid sized businesses networks. We work internationally, providing our customers with service through our regional representatives.

With over 12-year experience in successful offshore outsourcing engagements and delivering state-of-the-art IT solutions, Mudango Computers LTD. has contributed to the success of its employees and its customers by creating value and confidence in every undertaking. Meeting the demands of a diverse marketplace, Mudango Computers LTD. has been developing pragmatic, cutting-edge technology services and application solutions for both private businesses and global corporations allowing them to surpass their competition.

A trusted business partner and adviser to our clients, Mudango Computers LTD. leverages a powerful blend of the best industry-proven practices and leading standards, refined business acumen and extensive market understanding, profound technical skills and immense hands-on experience to meet the toughest challenges that our clients face, help them to compete successfully in the ever-changing IT marketplace and achieve the maximum return on investment.

Where We Are Coming From? – History

The company was formed in 2009, by a team of young, versatile entrepreneurs who have acquired extensive expertise in various facets of IT services. With core competence in the area of ERP solutions, network Infrastructure design and layout and custom-designed software applications using proprietary and open-source development platforms, we are well positioned to render value-added services to every individual industry whether public, private or non-governmental, as well as improve public confidence in the Nigerian IT industry.

With business office located in Abuja, Mudango Computers LTD. has within the limited time of commencing business operation, been able to provide innovative and cutting edge IT services and other related activities to various classes of clients, cutting across both the public and private sectors. We have also brought new standards into the industry; by approaching each client's project with a well thought-out solutions that has helped positioned them as an emerging leader in their respective industries. Our goal has been to exceed the expectations our clients by offering them outstanding customer service, increased flexibility, and greater value for their investment, thus optimizing system functionality and improving operational efficiency.

Where We Are Today?

As at today, we are proud to say that we have established ourselves as a dependant partner, delivering services on time and meeting expected standards. As evident from our client base, this is a lot for an upcoming venture. However, our plan is to dominate the industry while concentrating our strength and activities on other well rewarding pursuits. As such our Vision is to become the market leader in the design, development and deployment of a complete suite of IT services by the year 2015. In order to effectively bring this to fruition, we shall be guided by our Mission which is

“Delivering excellent and value-added ICT services through the combination of creativity, innovation and a well motivated staffs’ entrepreneurial drive “

Who We Are?

The company's activities are directed by and based on our core values. These values have become a culture for all staffs of the company and have extended to service delivery and customers. Our values make us who we are today. We at Mudango Computers LTD. pledge to consistently;

- ✓ Promote **PROFESSIONALISM**..... Among ourselves and with our customers
- ✓ Encourage **RESOURCEFULNESS** support creativity and reward outstanding performance
- ✓ Embrace **INNOVATION**..... Drive it and take advantage of its opportunity
- ✓ We are **DEPENDABLE**.....Positioned to creatively create value added services for client's enhanced business efficiency
- ✓ Deliver **EXCELLENT SERVICES**..... Set the pace for today's competition

"Technologies purpose is to support your business mission giving your team effortless access to company information, to support a pleasurable customer service experience."

1.1 OVERVIEW

The company is focused on reducing Total Cost of Ownership, (TCO) having a very real and significant effect on Return on Investment (ROI) while, greatly increasing overall security and efficiency. Well designed Networks at lower costs are our mantra. Mudango Computers LTD. was formed in 2009, with the overarching philosophy that IT Implementation could be greatly enhanced by key design factors being integrated into a centralized management console.

While over the years, better firewalls, intrusion detection systems, vulnerability assessment tools, etc. have greatly increased security, we have hit a point of diminishing returns with just these technologies.

The founding vision was that companies could significantly increase Network security, if only they could better manage their current technological infrastructure.

Mudango Computers LTD. has established a reputation for quality work and plans to continue to enhance its image in the industry. The company is a well-known and respected provider of advanced network solutions by:

- ✓ Increasing service offerings.
- ✓ Increasing availability and accessibility to current and future clients.
- ✓ Creating innovative, unique, and cost-effective solutions to problems currently faced by customers all over the world.

1.2 OUR CUSTOMERS

Since its inception, Mudango Computers LTD. has been a customer-focused company. We have a strong track record of repeat business from our clients, while continuing to win new customers on a consistent basis. Our long-term, time-built relationships with our customers based on confidence and trust are the result of our demonstrated performance in technology fields, industry specific expertise, product knowledge, along with proven consulting and project management methodologies for each customer and engagement.

At Mudango Computers LTD. we consider our success is on the line with our customer's satisfaction. We are committed to applying a unique depth of understanding your individual business needs, and we go an extra mile to make sure you are getting the best-of-breed solution catered to perfectly fit your requirements and objectives. This commitment has allowed us to build up a wide client network all around the world and ensures that our customers will keep coming back. We are proud of our impressive customer list which is continually expanding, and so is the demand for our services.

Mudango Computers LTD. is a company driven to provide customers with a complete solution to their entire current and future IT needs. The company's customer base includes all consumers, small, medium-sized to large corporations, including start-ups. Mudango Computers LTD. benefits from several strategic alliances by receiving very competitive pricing, allowing the company to offer competitive pricing on its services to customers and lowering capital expenditure on communication, network and security services.

2.0 OUR TEAM

Mudango Computers LTD. engineers combine their profound knowledge, skills and technical expertise with capability of in-depth analysis, design, and implementation of projects of any complexity as per customer's requirements. At Mudango Computers LTD. we recruit and hire only the best and the brightest technical and functional experts with demonstrated skills and proven track records. Our project-oriented organizational structure provides the quickest means to scope a project, form teams, and assign sufficient and appropriate personnel to complete projects on schedule and within budget.

At Mudango Computers LTD. all engineers participate in dedicated learning programs and challenging projects in order to keep up with the constantly changing landscape of IT technology. This persistent technological advancement allows us to build a company that attracts, develops, motivates, excites, and retains highly-skilled and committed personnel.

We employ a world-class management team with direct knowledge of the industry, extensive research experience, technical know-how, unique administration skills and deep bench of Cisco certified engineers in the region (CCNP, CCIE, CCNA CCDP, CCSP), Microsoft Certified Engineers (MCSE) Oracle Certified Professional OCA/OCP and Linux Certified Engineers (RHCE).

2.1 OUR SERVICES

Over the past 12 years, Mudango Computers LTD. has been providing a wide array of end-to-end IT solutions for a range of key vertical industries and horizontal competencies. Leveraging a powerful combination of the best industry-proven practices and leading standards, strategic vision, a vast spectrum of technical and technological competencies, Mudango Computers LTD. offers its clients a comprehensive suite of IT services including Strategic Business Planning, Software Consulting, Software Design, Project Management Resources, Re-engineering, Software Upgrades and Website Enhancement, and Rapid Application Development.

From the strategy consulting to complete implementation, Mudango Computers LTD. has been delivering unique business-oriented solutions meeting the toughest challenges that our clients face and helping them compete successfully in the ever-changing IT marketplace. At Mudango Computers LTD. we practice a follow-on activity. To that end, we always remain in contact with the clients after completed service delivery and should any issues arise regarding upgrades or enhancements, our highly-

skilled team is available for further engagements to assist you in meeting unforeseen challenges and getting a competitive edge in the marketplace.

If you have some idea in mind or you are thinking of applying IT technology in a unique and interesting way and you are not sure whether the concept is feasible, our consultants can assist you with technical advice, investigation and assessment resulting in a project feasibility report to provide you with a clear vision of how this solution can be used to meet your business objectives or gain a distinct advantage over competitors. If you need the assurance that your concept is both technically and financially viable prior to investing in development, our highly experienced and top class team of professionals can implement feasibility study, prototypes and proof of concept demonstrations for validating your concept thus helping you envision your custom application before it is developed and make decisions as to committing it to implementation.

All services are competitively priced and targeted to large and mid-size corporations. Mudango Computers LTD. feels that this market segment has largely been neglected because of the amount of "hand-holding" required by this segment, and the inability to pay the astronomical fees charged by many IT Consulting Services and ISPs for typically poor service and user support.

By working with Mudango Computers LTD., we simplify the creation, management, and support of our services, we enable customers to perform many tasks themselves, or automating these tasks based on the customer's stated needs i.e., the customer/client gets to run the show at least 50% of the time. This in turn makes our pricing more competitive, the customer's perception of service high, and the operation as a whole more reliable and profitable.

2.2 SERVICE DESCRIPTION

- **NETWORK IMPLIMENTATION, INSTALLATION AND ADMINISTRATION**

Mudango Computers LTD. network installation solutions are designed to provide clients with state-of-the-art technology without the burden and cost of developing the in-house expertise required to operate and manage the covered infrastructure. Mudango Computers LTD. manages the installed network system from an application level perspective.

Our network administrators maintain all system patches, updates and backups. Policy changes, upgrades and log analysis are components that require a significant amount of product knowledge and time to complete. Mudango Computers LTD. Network will help increase the overall security of your business infrastructure.

- **REMOTE ACCESS AND CONTROL**

Remote control solutions that allow our staff to control, manage, and communicate with all OS Platform systems remotely from across the internet and your network. Remote Desktop reduces unnecessary travel costs and wasted time while improving customer service and problem resolution times.

- **CUSTOM SOFTWARE DESIGN & DEVELOPMENT**

Mudango Computers LTD. has carved out a successful niche for itself in custom software design and development. We provide complete software implementation process, starting with software design and development, software quality assurance testing, software deployment, up to further software

upgrades and enhancements. The core software design and development services provided by Mudango Computers LTD. include, but are not limited to, desktop application development, high-end client-server application development, enterprise application development and building end-to-end enterprise application integration (EAI) solutions, re-engineering, software systems maintenance and support. Mudango Computers LTD.'s software engineers have gained profound experience and proven background in Borland C++ / Delphi, Microsoft Visual C++ / C++ .NET / C# .NET, and other Windows tools and technologies gained through successful implementation and delivery of custom software solutions in diverse vertical industries.

Since a well-conceived technology solution is fundamental for your success, we provide a team of professional technical consultants who can assist you in selecting the right custom software solution by analyzing functional, technical, operational, and financial requirements. All our consulting engagements start with defining and understanding your business issues. Not only do our consultants grasp your specific needs, but also strive to apprehend exactly what you seek. With such attention to detail, our team of business and technical consultants undertakes a profound requirements analysis, needs assessments and strategic planning, resulting in elaboration of a Statement of Work document covering all issues required for your custom software design and development.

At Mudango Computers LTD. we follow our standardized and refined software development process that provides a flexible and scalable framework for delivering any project (regardless of size or complexity) on time, within budget and with high quality meeting both current and future IT challenges of our customers. This methodology is applied to each custom software application development project to ensure the quality and reliability of products we develop for you.

- **CUSTOM WEB APPLICATION DESIGN & DEVELOPMENT**

Possessing all the latest web technology innovations at our fingertips combined with our long-standing experience in website and web application development, allows us to provide you with the right solution for your unique business needs. Our top class team of professionals with strong backgrounds and advanced technical skills can manage your product from "Concept to Completion", from in-depth technical analysis and assessment to complete development and implementation. Mudango Computers LTD.'s expertise in custom web application development covers the following main areas: e-Commerce Solutions (B2B, B2C), Content Management Systems (CMS), Customer Relationship Management (CRM), database driven web site & application, web enabling legacy systems, web portals design and development, Application Service Provider (ASP) solutions, web application re-engineering, and website enhancements.

Having achieved profound experience in such web tools and technologies as ASP.NET, C#, PHP, MySQL, MS SQL server through successful completion of dozens of custom web development projects for a variety of industries, Mudango Computers LTD. can offer everything you need to start conducting business online over the Internet. Irrespective of the size or nature of the business, you can benefit from our proven background in professional web site and web application development and be ensured that your online business will gain the competitive edge within your marketplace.

Once your web product is up and running, you will be provided with our support and maintenance afterwards in whatever format suits you most. As your business grows and you want to add optional features, our team will work with you to measure the performance of your web application and make enhancements to ensure your strategy stays on track with your customers and the constantly changing

Internet environment. You may be confident you will be provided with the most up-to-date solutions since we keep up with the cutting edge of new technologies and this is a crucial asset we always maintain.

- **CUSTOM DATABASE DESIGN, DEVELOPMENT & MANAGEMENT**

Mudango Computers LTD. has accumulated years of cross-industry expertise in database design, database development and programming, database integration and conversion, database management and administration, database maintenance and support. Profound knowledge and extensive hands-on experience in Oracle, MS SQL Server, MySQL, PostgreSQL, IBM DB2, Sybase and other relational database management systems (RDBMS) ensures our clients will get most out of their business being provided with a highly sophisticated database solution that is fast, scalable and efficient.

Whether you need a database driven web site or a full-featured, large-scale customer relationship management system incorporating Oracle database servers with complex structure, Mudango Computers LTD. can offer you the top-of-the-line database application development services tailored to your specific needs and providing you with an important competitive advantage. Our ability to combine strategic vision with in-depth expertise in a wide variety of cutting-edge database technologies ensures our clients are delivered robust database systems that automate and streamline their business processes, improve operational efficiency and management effectiveness, increase market reach and maximize return on investment.

- **PROJECT MANAGEMENT DEVELOPMENT**

As businesses strive to increase rate of return on continually decreasing investment, building a project management capability has become critical. Unfortunately, standard or off-the-shelf training packages often fail to deliver the anticipated benefits. Turn to our Project Management Capability Development solution. Mudango Computers LTD. assesses your organization's capability, determine target levels, custom-tailor a plan to meet your specific business needs and effectively measure ongoing benefits.

Our innovative approach to improving your project management capability focuses on delivering value against a set of key performance indicators. To help consistently map your organization's PM capability, we've designed a proprietary Project Management Maturity Model (PM³). An integral part of PM³ is developing processes to efficiently build and enhance your capability, along with implementing any insufficient project management components.

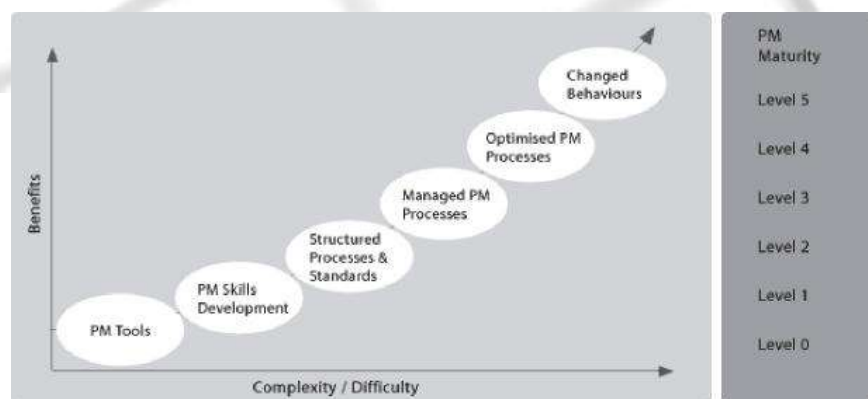

Figure 1 - Our proprietary Project Management Maturity Model (PM³)

USE OR DISCLOSURE OF DATA CONTAINED ON THIS SHEET IS SUBJECT TO THE RESTRICTION ON THE TITLE PAGE OF THIS COMPANY PROFILE.

Privileged and Confidential Information
For management's use only

Our Project Management Capability Development solution can benefit organizations facing any of the following issues:

- ✓ A history of falling short of project objectives
- ✓ Failing to deliver projects and tasks within time and cost constraints
- ✓ Key project management and technical resources that are regularly overloaded
- ✓ Projects that have stopped or run out of steam
- ✓ Dynamics of business forcing increasing project complexity
- ✓ Insufficient project management staff

By employing our solution to enhance your project and program management capability, you can:

- ✓ Prioritize projects for strategic advantage
- ✓ Lead projects and fully realize potential benefits
- ✓ Increase the rate of return of projects
- ✓ Build lasting relationships with customers, shareholders and other stakeholders
- ✓ Communicate the ongoing value of projects in the corporate economic context
- ✓ Reap process, productivity and profitability improvements across the organization
- ✓ Maintain key project management skills within the organization

• **PROJECT MANAGEMENT OUTSOURCING**

Gain professional project management expertise—where and when you need it—while growing and optimizing your internal capability. With Mudango Computers LTD.'s Project Management Outsourcing service, you have the flexibility of ramping up your project resources when necessary, while enriching your organization with access to our vast project expertise.

Core to our Project Management Outsourcing service is collaboration: developing a strong partnership with you. We come to understand your culture, way of working and strategic goals. We then help build an optimally sized project management resource that maximizes your core internal team, while utilizing our experienced staff to effectively cover any weak spots. While doing so, we ensure efficient transfer of project skills and new techniques to your staff via structured mentoring and coaching.

Project Management Outsourcing is of particular value if your organization runs multiple projects simultaneously or is embarking on a new initiative without the project management skills to successfully deliver it. PM Outsourcing is also valuable if your company:

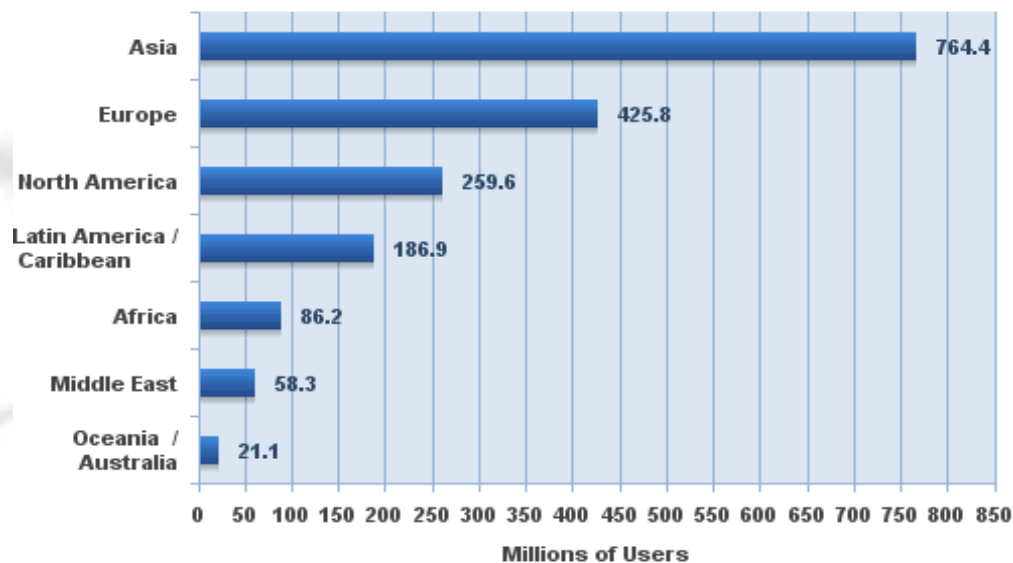

- ✓ Uses contract or temporary project management resources
- ✓ Works within a multi-project or multi-location project environment
- ✓ Has difficulty planning project resource needs
- ✓ Has an over-stretched internal project team
- ✓ Needs to improve the effectiveness of project management staff
- ✓ Has a business-critical project that needs urgent attention
- ✓ Wants to maximize an internal team without losing control to third parties

- **ICT TRAINING AND DEVELOPMENT**

Technology is advancing at lightning speed to make every aspect of our lives faster, easier, more secure and comfortable. Today, computers manage everything from emails and business calls to home security and sophisticated surgeries. We are living in an age where computer knowledge is imperative for all industries to function at its highest peak while remaining competitive with the world market. More than ever, it is essential for the private and government sector and its employees to acquire the most advance computer training and knowledge for the protection and services of its people.

According to the World Internet and Computer Usage Statistics, over 90% of the U.S. population, over 76.5% of European nations, over 800 million Asians and nearly 200 million Latin Americans incorporate computer usage in their day-to-day business and personal activities. In comparison however, only 8.7% or approximately 86 million Africans incorporate computer usage in their day-to-day lives, business or personal, respectively (Figure A).

- **INFORMATION TECHNOLOGY CONSULTING**

In today's fast-paced and rapidly changing Information Technology environment, the appropriate use of technology and strategic business planning solutions tailored to your business needs and objectives is the key to your success. With an in-depth understanding of business process and technology along with hands-on experience gained through working on critical issues in key industries of the IT marketplace, Mudango Computers LTD. is committed to providing you with top-end consulting services and solutions to meet your unique business challenges.

Our professional team of business and technology consultants brings a wide variety of knowledge and skills combined with functional and industry experience to serve the high-demanding consulting and strategy planning needs of our clients for software, web, database design and development solutions.

We are flexible to meet the diversity of your special requirements thus offering the services of our pre-qualified, experienced Information Technology consultants on both short-term and long-term assignments, from technical consulting helping your IT department in evaluating your current implementation and recommending enhancements, to evaluation and needs assessment, selecting the appropriate technology and tools, project management solution, and development of the complete end-to-end web application or software product.

- **EMAIL SERVICES**

Email Service Solutions are designed for small to medium business users who need control of their email. At Mudango Computers LTD, we specialize in Microsoft Exchange and advanced features such as Outlook Web Access (OWA), anti-virus scanning, anti-spam filters, group mail, out of office replies, rules and alerts configuration, etc giving you the flexibility to focus on other issues. There is no better way to increase your professional image than by branding your email.

- **SOLAR ENERGY SERVICE**

Mudango Computers LTD. is one of the new breed of solar companies in Africa. Since 2006 our company has been installing solar systems for its residential, commercial, government and municipal clients. As a pioneer in the solar field, we have witnessed the industry evolve from "ground zero." In this period we have experimented with different system designs as well as a myriad of different solar collectors, controls, pumps, and storage media. As a result we have "hands-on" experience with applications that are truly cost effective and long lasting.

- **WIRELESS NETWORKING SOLUTIONS**

In the February 2nd 2004 CIO Research Reports' survey of 250 IT executives, 77% of wireless technology organizations reported productivity gains. Wireless local area networks (WLANs) give employees the freedom to access real-time business information anytime/anywhere within your office or campus environment. Outside the office, public WLANs can deliver secure, high speed connectivity and convenient availability of e-mail, Internet, and print capabilities.

Your options? Staggering. Opportunities? Endless. But exactly how can a WLAN boost your organization's productivity? What's the best way to securely deploy and integrate WLAN technology across your network? How can you leverage this technology to build your customer base? Beware.

USE OR DISCLOSURE OF DATA CONTAINED ON THIS SHEET IS SUBJECT TO THE RESTRICTION ON THE TITLE PAGE OF THIS COMPANY PROFILE.

Privileged and Confidential Information
For management's use only

Danger abounds! One wrong decision could expose your data, weaken your security, degrade your network and drain your profits.

Adding or switching to a wireless infrastructure changes the way your employees work by potentially offering:

- ***Productivity gains***
- ***Improved customer relationships***
- ***Increased Flexibility***
- ***Flexibility***
- ***Easier adds, moves, and changes; lower support and maintenance costs***
- ***More efficient use of office space***
- ***Reduced errors***

Look to Mudango Computers LTD. for the answers and the know-how to create a WLAN tailored to your specific needs. Together with our industry-leading partners, we integrate hardware, software, and services to provide a seamless underlying infrastructure to help increase efficiency and productivity while achieving return on your investment.

- **DESKTOP SUPPORT SOLUTIONS**

Mudango Computers LTD. Desktop support solutions provide comprehensive management of our clients' total desktop environment. We support PC's, laptops, and hand-held computing devices, as well as all the associated support services, and on-site support to take care of any problem that may arise, asset management of all the hardware and software, and the administration of the servers and network that tie it all together. Mudango Computers LTD. Desktop support solutions protect and optimize your desktop environment. We deliver all the desktop and helpdesk support you'd expect. The result: higher productivity, a more solid return on your investment... and services that are absolutely essential to the stabilization and day to day running of your establishment.

- **DISASTER RECOVERY SOLUTIONS**

Uninterrupted business operations are imperative for today's enterprise. ERP solutions, eBusiness, business-intelligence software and people networked together in virtual organizations are all elements of many modern and successful businesses. These new solutions create a requirement for 24-hours-a-day, 365-days-a-year data and application availability. No exceptions.

Mudango Computers LTD. has been designing and recommending Disaster Recovery & Backup Solutions for many years. Our consultants have hands-on experience in many environments, within many markets and can devise a cost effective Disaster Recovery & Backup Solution to best suit your requirements.

Our solutions can replicate all critical data continually ensuring it is available for restoration 24 hours per day, 7 days per week. In the event of a disaster, this data can be accessed quickly & easily with little or no reconfiguration, using the Backup products and tools contained within our solutions.

From hosted web servers to office email servers it is now possible and cost effective to employ Off-site Backup solutions for critical data using existing external bandwidth. These solutions can be real time or overnight.

Many companies use the "off-site tape" method, sending a backup copy of critical data offsite every night. In the event of a disaster, recovery involves setting up the necessary IT infrastructure & restoring from tape - not to mention the loss of all data changes since the backup was performed. Anybody who has restored a single critical server from backup tapes will know this can take hours or days. In a disaster recovery situation, you may have to recover 10, 50 or more servers at the same time - with the business losing money and customers, hour by hour. In real terms this could result in the company going out of business.

"Perceived cost? Think about what affect the loss of that data will have on your business."

Mudango Computers LTD. have market proven solutions that provide the best level of data and business protection in the event of any type of technical or physical disaster.

Small-to-large sized enterprises depend on reliability and protection solutions for their business-critical applications, data, networks and servers, and these solutions have become one of the top priorities in corporate IT departments. Reliability of end-user application services can only be attained if all components required to execute are up and running at the user requests.

These include a wide variety of server and storage hardware, databases, operating systems and middleware technologies as well as application software itself. As a result, the best High Availability software products must be able to manage and protect the uptime of all of critical data, end-to-end, across platforms, from LAN to WAN.

High Availability allows you to retain access to your critical data and applications even during system, or system-component, failures. It is achieved through fault tolerance and other Availability Management strategies. Our professionals at Mudango Computers LTD. can sort through the complexity of various computing hardware, peripherals, communications equipment, operating systems and infrastructure to help you develop a high availability and recovery solution that best suits your business needs.

Managing system availability is a critical part of many IT departments' function. System failures cost money, and sometimes jobs. To help those managing systems to plan for downtime, Mudango Computers LTD. offer high availability products such as Double-Take. We can offer these products as a stand-alone solution or part of our Managed Availability Service.

Double-Take enables you to have automated real time failover, via WAN & LAN, of your critical data. Its unique features enable time sensitive throttled WAN bandwidth usage. This enables the usage of existing external bandwidth and so reduces the cost on implementation over other available solutions. With byte-level replication ensuring maximum application performance and minimum bandwidth requirements, Double-Take reduces exposure to data loss and eliminates the single point of failure of shared disk storage.

"No company is disaster proof, but your data can be"

Double Take works with nearly every mainstream application. It is a real-time data replication and failover software product. Double-Take augments your existing data protection strategy by reducing downtime and data loss, and it provides these services with minimal impact on existing network and communication resources. Business continuity is vital to business success. It can no longer remain the concern of the IT department alone. How do you determine the continuity and recovery requirements of

your business? How do you identify and integrate critical business and IT priorities into a comprehensive continuity program? Where do you start? Right here.

Depending on your pre-determined tolerance for information loss, requirements and budget, you can choose to restore your operating environment in days, hours or even minutes. We use our business and technological expertise to help keep your information flowing--and your business running. Mudango Computers LTD.' expertise in developing a business continuity plan for your business follows a proven approach that will protect your business.

- **ANTI VIRUS ADMINISTRATION/IMPLEMENTATION**

Mudango Computers LTD. relies on a myriad of antivirus suites to ensure your network is secured 24/7. Using the Symantec administration console for PC and Macintosh, ISystems system administrators have the ability to manage the most critical central administrative functions for distributing and updating clients protected with Norton Antivirus for Pc and Macintosh. Our IT administrators are able to audit the machine name, location, software version installed and latest virus definitions update of each machine on your network without relying on any user action. In addition, the console is being designed to provide a view of the most recent viruses found on each machine within the network along with the ten most prevalent viruses.

With the aid of Symantec administration console we can offer the following functions:

- *Live Update virus definition and product updates on demand or scheduled*
- *Deployment of Norton Antivirus for Pc and Macintosh.*
- *Configuration changes pushed to Pc and Macintosh clients.*
- *Lock-down settings for the client to prevent users from changing preferences, such as canceling a virus scan or uninstalling the Norton Antivirus for Pc and Macintosh client.*
- *Storage of client data in the central MySQL database included with Mac OS X Server software. IT administrators can access the information via the SQL Database.*
- *Production of standard and customized reports easily accessible via the Web interface.*
- *Convenient, easy to use administration console that is accessible from any Web browser.*

Mudango Computers LTD. selects products, which meet the following criterion:

- **Benefit to customers/company:** the product must materially benefit the customer or the company in some way. This may manifest itself as a side benefit, an improvement on current services, or additional revenue stream to the company.
- **Cost/benefit ratio:** the benefits realized must be at least as great as the cost of implementation, production, and maintenance of the product.
- **Maintainability:** the product must be maintainable by Mudango Computers LTD. personnel. The company has had some experience with products where source code and other maintenance resources are unavailable and has had major difficulties with these restrictions.

Mudango Computers LTD. makes a concerted effort to keep customers informed and to remedy problems in the shortest possible times. The company has NEVER lost any customers to technical support issues, and will continue to make high quality support one of its primary goals.

Mudango Computers LTD. offers telephone support during extended business hours (9 a.m. to 5 p.m.), and has an on-call pager for emergencies (network-down and server-down situations). We also operate a 24/7-network operations center (NOC) with an Online Remote Access support.

3.0 WHY OUR SOLUTIONS WORK

- ✓ Commitment to excellence and customer satisfaction.
- ✓ Best-in-class partnerships based on sincerity, integrity, mutual respect and open communication.
- ✓ Extensive Cisco, Microsoft and Linux Technology Specializations: ATP-IPCC Express, IP Telephony Revised Specialization, VPN Security Specialization, Optical Specialization, Open Source Specialization, and Windows Server System.
- ✓ End-to-end “big Picture” network solutions orientation and presentation.
- ✓ Precise planning process and methodology combined with real world experience.
- ✓ Exceptional implementation, documentation and technical training.
- ✓ Mature technology transfer process.

“Imagine your business experience of; Flexibility, Mobility, Competitive edge, Freedom, and Confidence”

3.1 CONFIDENTIALITY

Information we use is very often confidential to customers and their client base. Mudango Computers LTD. has the security systems in place to ensure this confidentiality is protected, here and internationally.

Mudango Computers LTD. is the direct employer of the team. Mudango Computers LTD. does NOT contract our services to another provider, ensuring the confidentiality agreement is complete from your business through to the engineer delivering the service.

Our Client's Comments (Common client phrases)

“IT (Information Technology) THESE GUYS JUST WORKS!”

“Now I can go on leave for 3 weeks with peace of mind”

“I can focus ON my business while Mudango Computers LTD. helps IN the business”

“The team is extremely patient polite and really helpful”

“You speak English – not GEEK!”

3.2 COMPANY EXPERIENCE AND QUALIFICATIONS/IT PERSONNEL

MUDANGO COMPUTERS LTD.' EXPERIENCE

For **more than 10 years**, Mudango Computers LTD. has provided operational and maintenance technical support, server software technical support, software implementation services, network management, network engineering, help desk support, ADP programming and analysis support services to government and commercial clients. For **over 10 years**, Mudango Computers LTD. has provided such services to satisfied clients.

Mudango Computers LTD. provides expert technical assistance in the areas of Cisco, Sun Microsystems, Microsoft Operating Systems (Windows 9x/NT/2000/XP/2003) and BackOffice products (Exchange, IIS, SQL, and SMS), supporting application development, as well as testing and implementation of software/hardware.

The following includes some of the support we provide to Release Management: (1) Setting up and maintaining of testing Labs, (2) maintaining the software configurations for the various PC and server platforms in the test facility; (3) ensuring test facility hardware devices are properly installed, connected and functioning up to speed on the Clients LAN; (4) maintaining test facility hardware devices to a level required to perform the required testing; and (5) updating the hardware, software images and the site IDs on all of the test facility PCs.

Mudango Computers LTD. currently provides Microsoft technical assistance, operational and maintenance support, testing, configuration, implementation, software quality assurance (SQA) and support of application development services to Government agencies and private companies.
